

[Glenmore residents march to the Ngqushwa local municipality](#)

Afesis-corplan was in Peddie on June 27 where residents of Glenmore marched to the Ngqushwa local municipality to demand that municipal officials respond to a petition they handed over in April.

The petition relates to the Glenmore community sports field which the municipality spent more than R2-million refurbishing. However the sports field remains in a shambles.

The community marched to the municipality in April to handover a petition requesting that the municipality rectify the poor workmanship done to the sports field.

Residents gave the municipality 30 days to respond to the petition however the municipality did not respond.

This resulted in community members embarking on another peaceful march on June 27.

Until this date the Glenmore sports facility remains inaccessible to members of the community wishing to use it.

Afesis-corporation has been involved in attempts to get the Ngqushwa Municipality to share information on the project and rectify the sports field.

This was done as part of Afesis-corporation's Accounting for Basic Services Project which it is facilitating in Ngqushwa and Buffalo City Municipalities.

At the gate marchers we met by bouncers who then locked the gate. A few minutes later acting municipal manager at the Ngqushwa local municipality Mkhusele Mxekezo emerged from his offices to address the marchers. He said the petition in question was still being processed by the municipal's petition committee but could not give a date as to when it will be attended to.
